

Labs / Anonymous

Easy

Welcome to our "Anonymous" CTF! This challenge will test your ability to explore and exploit different services. Here's what you need to know to get started:

Steps to Success

1. **Start the Machine:** Begin by running the provided virtual machine.
2. **Complete Tasks:** Follow the tasks to gather clues and progress through the challenge.
3. **Investigate Services:** Explore the different services running on the machine.

Hint

- Investigate the FTP service for potential clues and information.

Goal

Your goal is to find the hidden flag formatted as a UIUD. Use your skills and creativity to uncover it. Good luck and have fun!

▶ Start Machine

Start the Machine and the IP will show here

To attack the target machine, you must start the Machine first.

What does FTP mean?

-ANS: file transfer protocol
