found `scripts.js`

```
if (input === 'bypass123') {  
    console.log("Success!");  
} else {  
    console.log("Wrong input.");  
}
```

since we cant input anything you can either do it using burp suite or browser console

```
fetch('/submit?input=bypass123', { method: 'POST' })  
  .then(response => response.json())  
  .then(data => {  
    console.log('Flag:', data.flag);  
  });
```
